Numerical id	5
Author	akrowne (2)
Entry type	Definition
Classification	msc 51-00
Related topic	Diameter2

The *radius* of a circle or sphere is the distance from the center of the figure to the outer edge (or surface.)

This definition actually holds in n dimensions; so 4th and 5th and k-dimensional "spheres" have radii. Since a circle is really a 2-dimensional sphere, its "radius" is merely an instance of the general definition.
